

As your child grows, the mattress grows too

## K2 Children's mattress

- 2 different sides for lying on, divided into zones according to size and tailored to the needs of children in their growth stage
- Turning the mattress is recommended once the child reaches a height of 150 cm
- Lightweight for comfortable handling
- Temperature and moisture balancing
- Low-maintenance thanks to removable, washable cover
- EIM and ECO test-certified
- Made in Germany

# K2

## A good children's mattress has two sides.

Children need optimal spinal support in every stage of growth. Because depending on age and weight, the requirements placed on the mattress change. This was the reason behind the development of the K2 – an extra-special children's mattress with two different sides for lying on. When a child reaches a height of approx. 150 cm, the mattress is simply turned.

As your child grows, the mattress grows too.

Children get their own first "big" bed between the ages of five and six. To prevent postural defects, it is essential that the mattress be tailored to the needs of children in their growth stage. The requirements for an ergonomic sleeping posture vary significantly depending on size:

### Children up to approx. 150 cm in height

Children between 5 and 10 years old have an almost straight spine. This is not yet fully formed and requires active, firm support. The **unzoned side** of the K2 children's mattress provides optimum body support and remains elastic and sturdy even after years of use.

Unzoned side

When a child reaches a height of approx. 150 cm, the mattress is turned.

Zoned side

Head

Shoulders

Lumbar region

Pelvic region

Thighs

Calves

Feet

### Children above approx. 150 cm in height

From the age of 11, the adolescent spine develops the usual double-S shape. With its 7 zones, the **zoned side** of the K2 children's mattress adapts perfectly to the child's body contour and supports the spine in this important growth stage. The cover is tailored to this zoning too.

	80	90	100	120	140
190	•	•	•	•	•
200	•	•	•	•	•
210	•	•	•	•	•
220	•	•	•	•	•

Recommended for a max. weight of 90 kg

## Points to consider when buying a children's mattress:

- ! The mattress should be tailored to the needs of children in their growth stage.
- ! The slatted frame is a decisive factor in terms of how a mattress functions. Find the perfect slatted frame in our Selecta Value range
- ! Only anti-allergy and non-toxic materials should be used.
- ! The cover should be removable and washable.
- ! The mattress should be at least 20 cm longer than the child's height.
