S5 Cold foam mattress with plant oils

The ultra-dynamic core made of HR cold foam with soy bean oil is characterized by high-precision elasticity. A mattress that offers excellent support.

Selecta covers have a soft surface and are especially sturdy. They ensure excellent moisture balance.

Washable cover

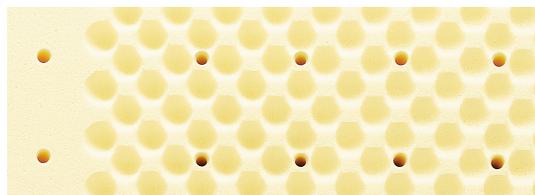

All-around finish S860
Finished border S861

- Sturdy double jersey, 59% polyester, 41% viscose
- Quilted with approx. 400 g/m² of breathable fiber
- All-around zipper
- Separately removable cover
- Washable up to 60 °C

Wool ticking

All-around finish S160
Finished border S161

- Sturdy double jersey, 59% polyester, 41% viscose
- Quilted with approx. 500 g/m² of sheep's wool and approx. 200 g/m² of breathable fiber
- All-around zipper
- Separately removable cover
- Dry-clean safe

Core

- Highly dynamic elastic core, made of high-quality HR cold foam, manufactured using soy bean oil and with a density of 50 kg/m³
- Division into 7 anatomically designed functional zones
- Middle-zone reinforcement
- Comfort zone for shoulders
- The mattress is very point-elastic thanks to a grid structure that divides it into numerous small support sections, resulting in an extremely comfortable lying sensation
- Surface profiling with vertical bores and an open-pore material structure for very good ventilation
- Core height approx. 15 cm
Height with cover approx. 18 cm
- Firmness: soft, medium, firm

Recommended firmness

Weight kg	Height cm				
	below 160	160-170	170-180	180-190	above 190
below 50	soft	soft	soft	soft	soft
50-60	medium	soft	soft	soft	soft
60-70	medium	medium	medium	soft	soft
70-80	firm	medium	medium	medium	medium
80-90	firm	firm	firm	medium	medium
above 90	firm	firm	firm	firm	firm

The use of **soy bean oil** in mattresses is not only environmentally friendly (as it is a renewable resource), but also results in excellent material quality in terms of elasticity and durability.
